## Sammenhengende tjenester

EU vurderer å realisere sammenhengende tjenester med "EU Digital Wallet". Målet er sømløse tjenester på tvers av alle sektorer og land.

Symfoni bidrar til å realisere dette.

# Microsoft's strategy for Decentralized Identity

**Microsoft's mission is to empower every person on the planet to achieve more.**

Microsoft cloud identity systems already empower developers, organizations, and billions of people to work, play, and achieve more, but there's so much more we can do

can own so they can control their digital identity and data. This self-owned identity must seamlessly integrate into our daily lives, providing complete control over

# Science and Technology

## We are the Department's Science Advisor and research and development arm.

---

Since 2003, the Department of Homeland Security (DHS) Science and Technology Directorate (S&T) has provided sound, evidence-based scientific and technical perspectives to address a broad spectrum of current and emerging threats.

# DHS/U.S. Citizenship and Immigration Services >> Need for Global Interoperability of US Immigration Credentials

- Prioritizing privacy and security to ensure individual control and consent over use of data
- Equity and access with a bridge to paper to ensure no digital divide
- No expectation that everyone uses the same technology platform or vendor
- Interfaces between systems based on global, open, royalty free and free to use data and protocol standards that ensure multi-platform, multi-vendor, cross-border interoperability

# Solution Shaping and Delivery via Multi-Tracking Competitively Selected Performers

# The OpenWallet Foundation

Enabling a trusted digital future through interoperability for a wide range of wallet use cases.

## The Mission

The OWF is a consortium of companies and non-profit organisations collaborating to drive global adoption of open, secure and interoperable digital wallet solutions as well as providing access to expertise and advice through our Government Advisory Council.

# Welcome to the NOBID Consortium

We are a set of Nordic and Baltic countries who, together with Italy and Germany, are developing a large-scale pilot for the payment use case in the EU Digital Wallet.

MARKET SCAN

## Building a Skills-Based Talent Marketplace

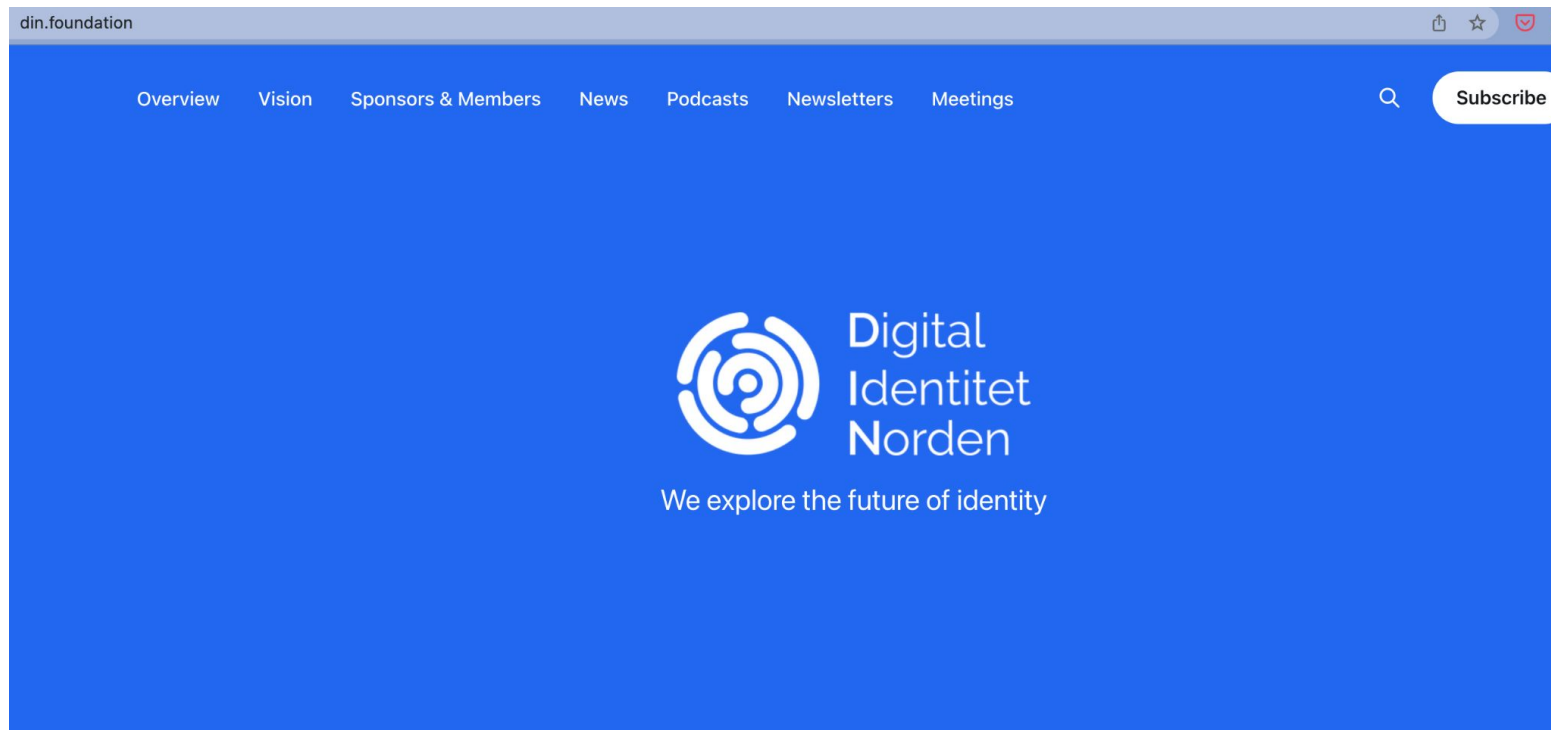

Verifiable Credentials Wallets for Learning and Employment

[DOWNLOAD THE MARKET SCAN](#)

Skills-based practices make pathways to good careers more accessible to a wider segment of the workforce by focusing on what workers can do, not on the degrees or certifications they've earned. The verifiable credentials wallets highlighted in this market scan give learners and workers the tools they need to communicate the totality of their skills and abilities and translate their achievements into future opportunities.
